INDEX TO VOL. X.

Agglutinins, effect of heat on, 26
Anaphylaxis with hydatid scolices, 115
ANDREWES, C. H., Virus III in tissue cultures. I. The appearance of intranuclear inclusions *in vitro*, 188. II. Further observations on the formation of inclusion bodies; III. Experiments bearing on immunity, 273
ASHNER, M., see *Kligler, I. J.*

B. influenzæ, isolation with penicillin, 226
Bactericidal power of blood, resistance of streptococci to, 375
Bacteriophage, effect of ultra-violet rays on, 45
——— multiplication in broth, 109
BAKER, S. L., DICKENS, F., and GALLIMORE, E. J., the glycolytic action of some tumours and the effect of insulin, 19
——— and NANAVUTTY, S. H., a quantitative study of the effect of ultra-violet rays upon the bacteriophage, 45
BEDSON, S. P., further observations on the mode of action of a viricidal serum, 364
——— and BLAND, J. O. W., a simple method for determining the electrical charge carried by virus particles, 67; complement-fixation with filterable viruses and their antisera, 393
BEGG, A. M., a filtrable fibro-sarcoma of the fowl, 322
BERENBLUM, I., tumour formation after freezing with carbon dioxide snow, 179
BLAKE, A. V., and OKELL, C. C., seasonal variation in the susceptibility of mice to dysentery (Shiga) toxin, 175
BLAND, J. O. W., filter and centrifuge experiments with neuro-vaccine, 145
——— see *Bedson, S. P.*
Botulism, relation to "grass disease" of horses, 352
BROOM, J. C., the exhaustion of media in bacterial culture, 71
——— see *Brown, H. C.*
BROWN, H. C., and BROOM, J. C., a simple microcataphoresis cell, 61; observations upon electric charge in certain bacteriological problems, 219; preliminary observations on electric charge in its relation to complement-fixation, 387
BURNET, F. M., a method for the study of bacteriophage multiplication in broth, 109
BYROM, F. B., blood phosphorus in health and disease: IV. The phosphorus content of the blood in diabetes mellitus, 10

CAMPBELL, J. A., comparison of the pathological effects of prolonged exposure to carbon monoxide with those produced by very low oxygen pressure, 304
Carbon monoxide poisoning, pathological effects of, 304
Cataphoresis, a simple cell, 61
CLARK-KENNEDY, A. E., see *Kerridge, P. K.*
CLEARKIN, P., the immunizing dose of vaccinia, 237
Complement, action of ammonia on, 249
——— fixation, electric charge in, 387
——— ——— with viruses, 393
Copper poisoning, 241
CRAMER, W., experimental carcinogenesis: the local resistance of the skin to the development of malignancy, 335
Culture media, exhaustion of, 71

DALLING, T., MASON, J. H., and GORDON, W. S., fowl-pox antiserum, 16
DAVIES, D. T., some observations on gastric secretion and its relationship to the urinary reaction, 1
Diabetes, blood phosphorus in, 10
DICKENS, F., see *Baker, S. L.*
Dysentery toxin, susceptibility of mice to, 175

EAGLES, G. H., and MCCLEAN, D., cultivation of vaccinia virus, 35
Electric charge of virus particles, 67
——— ——— in bacteriology, 219
——— ——— in complement-fixation, 387
ELFORD, W. J., ultra-filtration methods and their application in bacteriological and pathological studies, 126

FAIRBROTHER, R. W., the transmissibility to rabbits of poliomyelitis virus, 209
FELIX, A., and OLITZKI, L., the effect of heat on O and H immune bodies, 26

FILDES, P., Tetanus: VIII. The positive limit of oxidation-reduction potential required for the germination of spores of *B. tetani in vitro*, 151. IX. The oxidation-reduction potential of the subcutaneous tissue fluid of the guinea-pig; its effect on infection, 197
Filtration, collodion membranes, 360
——— ultra-filtration methods, 126
FINDLAY, G. M., notes on infectious myxomatosis of rabbits, 214
FISCHER, A., and PARKER, R. C., the occurrence of mitoses in normal and malignant tissues *in vitro*, 312
FLEMING, A., on the antibacterial action of cultures of a penicillium, with special reference to their use in the isolation of *B. influenzæ*, 226
Fowl-pox, antiserum, 16
——— transmission by mosquitoes, 347

GALLIMORE, E. J., see *Baker, S. L.*
Gastric secretion and urinary reaction, 1
GORDON, J., and MARSHALL, P. G., the action of ammonia on complement, 249
——— and STANSFIELD, F. R., lecithin and streptococcal hæmolysin, 191
GORDON, W. S., see *Dalling, T.*
"Grass disease" of horses, 352

Hæmolysin, streptococcal, 191
HAPPOLD, F. C., the effect of cultural variation on the antigenic development of *B. aertrycke* Mutton, 263
HARE, R., studies in immunity to hæmolytic streptococci. II. Variations in the ability of broth cultures to withstand the bactericidal power of normal human blood, 375
HASSANEIN, M. A., see *Schütze, H.*
Hydatid scolices, anaphylaxis with, 115

Insulin, effect of, on glycolysis, 19

JULIUS, H. W., innervation and tumour growth, 185

KAY, H. D., plasma phosphatase in osteitis deformans and in other diseases of bone, 253
KELLAWAY, C. H., anaphylactic studies with extracts of hydatid scolices, 115; the action of Australian snake venoms on plain muscle, 281
KERRIDGE, P. K., and CLARK-KENNEDY, A. E., the immediate acid change in shed blood in disease, 373
KERRIN, J. C., the distribution of *B. tetani* in the intestines of animals, 370
KLIGLER, I. J., and ASHNER, M., transmission of fowl-pox by mosquitoes; further observations, 347

LEPPER, E., and MARTIN, C. J., the chemical mechanisms exploited in the use of meat media for the cultivation of anaerobes, 327
LUDFORD, R. J., skin regeneration and cancer, 193

McCLEAN, D., see *Eagles, G. H.*
MARSHALL, P. G., see *Gordon, J.*
MARTIN, C. J., see *Lepper, E.*
MASON, J. H., see *Dalling, T.*
Myxomatomatosis of rabbits, 214

NANAVUTTY, S. H., see *Baker, S. L.*

O'BRIEN, R. A., OKELL, C. C., and PARISH, H. J., titration of scarlet fever antitoxin, 83
OKELL, C. C., see *Blake, A. V.*, and *O'Brien, R. A.*
OLITZKI, L., see *Felix, A.*
Oxidation-reduction, germination of tetanus spores, 151
——— mechanisms in meat medium, 327
——— potential of tissue fluids, 197
Oxygen, requirements of bacteria, 204
——— want, change in the blood picture in, 246
——— ——— pathological effects of, 304

PANTON, P. N., and VALENTINE, F. C. O., staphylococcal infection and reinfection, 257
PARISH, H. J., see *O'Brien, R. A.*
PARKER, R. C., see *Fischer, A.*
Penicillin, 226
Phosphatase in bone diseases, 253
Phosphorus in the blood, 10
Poliomyelitis virus, transmissibility to rabbits, 209
POLSON, C. J., chronic copper poisoning, 241

Reaction, immediate change in shed blood, 373

Scarlet fever, titration of antitoxin, 83
SCHÜTZE, H., and HASSANEIN, M. A., the oxygen requirements of *B. pestis* and Pasteurella strains, 204
SMITH, W., the distribution of virus and neutralizing antibodies in the blood and pathological exudates of rabbits infected with vaccinia, 93
Snake venom, action on plain muscle, 281
STANSFIELD, F. R., see *Gordon, J.*
Staphylococcus infection, 257

TALLERMAN, K. H., observations regarding alterations in the permeability of collodion membranes, 360

Tetanus, oxidation-reduction potential for germination of spores, 151
——— ——— of tissue fluids, 197
——— spores in the intestines of animals, 370
Tumours, effect of innervation on growth of, 185
——— filtrable sarcoma in the fowl, 322
——— glycolytic action of, 19
——— local resistance of the skin, 335
——— mitoses in cultures, 312
——— production of, by freezing, 179
——— skin regeneration and cancer, 193

Ultra-violet rays, effect on bacteriophage, 45
Urine, reaction of, 1

Vaccinia virus, cultivation of, 35
——— ——— distribution of, in blood of infected rabbits, 93
——— ——— filtration of, 145
——— ——— immunizing dose of, 237
Valentine, F. C. O., see *Panton, P. N.*
Variation, effect on antigen of Salmonellas, 263
Viricidal sera, mode of action, 364
Virus III, intranuclear inclusions, 188, 273
Viruses, complement-fixation with, 393

Walker, A. B., the relation of "grass disease" of horses to botulism, 352
Williamson, R., the increase in the number of red cells and the percentage of hæmoglobin in acute oxygen want, 246
